Instructional Design Portfolio

Leyli Nouraei Yeganeh

Content Design | Learning Experience Design | Applying for Instructional Products — Instructional Designer

Professional Profile

I am an instructional designer and content developer with 10+ years of experience transforming complex information into clear, sequenced, end-user instructional content across written guides, video lessons, interactive learning experiences, and digital platforms. I have a background in education, applied linguistics, translation, peer-reviewed publishing, AI-supported content design, and AI integration in education. I use audience research, engagement data, accessibility principles, and cross-functional collaboration to design, test, and refine learning experiences that are inclusive, effective, and engaging.

Core Strengths

Instructional & Content Design
Sequenced content, written guides, interactive learning, curriculum design

Writing & Editorial
Clarity, grammar, tone, voice, revision, translation

User Research & Content Decisions
Audience analysis, user goals, data-informed iteration

AI, Technology & Prototyping
Generative AI, n8n, Lovable, Docker, immersive learning, prototyping

Collaboration & Delivery
Cross-functional teamwork, stakeholder communication, concurrent deliverables

Portfolio Snapshot

10+ years
in education & instructional content

7 peer-reviewed publications
since 2025

Frameworks:
Meta-MILE & STREAM

Experience across
university, school, and industry contexts

Selected Roles

2023–Present	**Instructional Design Researcher — AI and Immersive Learning Programs**
2025–2026	**Mathematics and Reading Tutor**
2025	**Instructional Technology Assistant — Special Education Technologies**
2024	**STEM Program Instructor — After-School Program**
2017–2022	**Lecturer — Applied Linguistics and Education**
2012–2016	**English Language Instructor, K–12**
2020–2022	**Recruiting Specialist**

"Clear content empowers people to learn, grow, and create brighter futures."

PEOPLE + KNOWLEDGE = OPPORTUNITY

How I Work

Understand users → **Design & sequence content** → **Prototype & test** → **Measure & iterate**

Research Projects & Instructional Innovation

Selected projects, contributions, and evidence

01 Meta-MILE (2025)

The Future of Education: A Multi-Layered Metaverse Classroom Model for Immersive and Inclusive Learning

Project Summary

Designed a framework for immersive, inclusive learning in virtual environments.

My Contribution

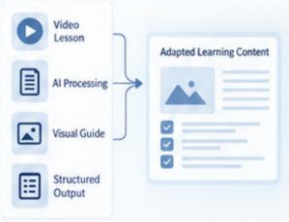

Conceptual design, writing, editing, visualization, and cross-disciplinary collaboration.

Why It Matters

Shows experience in translating emerging technology into user-centered instructional design.

02 STREAM (2025)

Semantic Transformation and Real-Time Educational Adaptation Multimodal

Project Summary

AI-supported workflow that transforms recorded STEM lessons into concise, sequenced, traceable visual guidance.

My Contribution

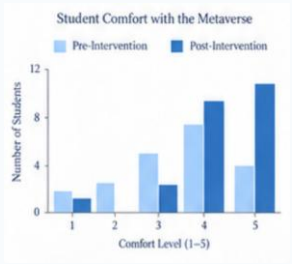

Design, writing, editing, accessibility thinking, and quality review.

Key Result

9.2/10 average content-quality rubric score in offline feasibility pilot

03 Immersive Future

A Case Study of Metaverse in Preparing Students for Career Readiness

Project Summary

20-minute VR design-studio study evaluating usability, comfort, and perceived relevance for computer-design students.

My Contribution

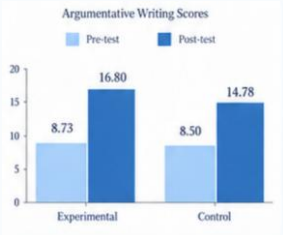

Study design, analysis, and recommendations for training and support.

Key Result

16 of 28 students reported increased comfort with the technology

04 Self-Regulated Learning in Flipped Learning

Integrating Self-Regulated Learning in Flipped Learning to Enhance Argumentative Writing with Digital Tools

Project Summary

Structured digital learning using EdPuzzle, Google Docs, and Padlet to support goal-setting, feedback, and reflection.

My Contribution

Instructional design, sequencing, and data-informed evaluation.

Key Result

1.92 points higher final writing score after accounting for initial ability

What These Projects Demonstrate

- **Analyze user goals**
- **Choose the right format**
- **Use data to improve content**
- **Collaborate cross-functionally**
- **Incorporate AI responsibly**

Professional Experience & Practice

Complementary STAR stories from teaching, training, content design, and coordination

Instructional Technology Assistant

Binghamton University
May–Aug 2025

- Developed train-the-trainer materials on assistive and special education technologies
- Translated procedures into clear explanations and demonstrations
- Advised on accessibility and digital equity

Role fit: Translating technical concepts into end-user guidance

STEM Program Instructor

Binghamton University
Aug–Dec 2024

- Designed hands-on and gamified K–12 STEM content
- Adapted pacing, explanations, and sequencing to learner needs
- Collected engagement data and revised instruction

Role fit: Data-informed iteration and alternative content formats

Mathematics & Reading Tutor

Windsor Middle School
Aug 2025–May 2026

- Delivered targeted small-group instruction
- Adjusted learner-facing materials, explanations, and pacing
- Responded to demonstrated understanding

Role fit: Audience-centered instruction

Lecturer

University of Qom
Sep 2017–Jun 2022

- Broke down complex concepts into clear sequenced instruction
- Developed curriculum materials, assessments, and testing tools
- Reviewed writing for clarity, grammar, style, accuracy, and consistency

Role fit: Writing craft and instructional organization

English Language Instructor, K–12

Motarjem Institute
Apr 2012–Mar 2016

- Designed audience-appropriate instructional content
- Developed flipped-learning video lessons
- Created self-regulated learning materials

Role fit: Multimodal content design

Recruiting Specialist

Arad Branding
Jun 2020–Jun 2022

- Managed concurrent full-cycle hiring pipelines
- Coordinated timelines, requirements, and priorities
- Communicated across departments and stakeholders

Role fit: Overlapping workflows and cross-functional coordination

Beginner-Friendly Instruction Example

Sequencing Nursery Rhymes Through Early Coding in Preschool Settings

Used precise wording, visual cues, and story-based sequencing to introduce coding concepts to preschool learners.

All 4 participating children correctly sequenced the complete story in the post-assessment.

Highlights the importance of visual guidance and carefully chosen wording.

Selected Publications, Tools, and Role Alignment

Leyli Nouraei Yeganeh | Instructional Design Portfolio

Selected Publications

2025	The Future of Education: A Multi-Layered Metaverse Classroom Model for Immersive and Inclusive Learning
2025	STREAM: A Semantic Transformation and Real-Time Educational Adaptation Multimodal Framework in Personalized Virtual Classrooms
2025	Integrating Self-Regulated Learning in Flipped Learning to Enhance Argumentative Writing with Digital Tools
2025	Sequencing Nursery Rhymes Through Early Coding in Preschool Settings
2025	Immersive Future: A Case Study of Metaverse in Preparing Students for Career Readiness
2016	A Comparison of the Effects of Dictogloss and Oral Dialogue Journal Techniques on Iranian EFL Learners' Acquisition of Request Speech Act
2016	An Analysis of Pragmatic Competence in 2013 Presidential Election Candidates of Iran

Eight peer-reviewed publications total; full record available on Google Scholar.

Tools & Methods

n8n Workflow automation	**Lovable** AI-assisted app prototyping	**Docker** Containerized app environments	**AI integration in education** Personalized content and instructional design	
ChatGPT	Gemini	Google Workspace	EdPuzzle	Google Docs
Padlet	Excel	SPSS	Python	VR/AR & Metaverse authoring platforms
Chromebooks	Peer review	Mixed-methods research	Accessibility	Prototyping

Alignment with the Role

Design and write end-user instructional content	→ Research, teaching, and train-the-trainer materials
Analyze user goals and sequence content	→ Tutoring, SRL, and STEM design
Use data to identify gaps and measure impact	→ Engagement data, surveys, and outcome studies
Work with cross-functional partners	→ Education and engineering collaborations
Manage concurrent projects and shifting priorities	→ Research portfolio and recruiting coordination
Incorporate AI throughout workflow	→ STREAM and AI integration in education
Propose alternative ways to display content	→ Visual guides, VR/AR, interactive videos, and gamified learning

"I bring instructional design, writing craft, technical curiosity, and data-informed iteration to help users discover what products can do and how to use them."

Leyli Nouraei Yeganeh | Binghamton, NY | lnourae1@binghamton.edu
